

TECHNICAL SKILLS

- **Backend:**
Laravel, PHP, Node.js, REST APIs, Microservices
- **Frontend:**
Vue.js, Nuxt, React, Next.js, JavaScript, TypeScript, Tailwind CSS, Bootstrap, HTML5, CSS3
- **Databases:**
MySQL, PostgreSQL, Redis, MongoDB, Elasticsearch
- **Architecture:**
Scalable Application Architecture, Design Patterns, SOLID Principles, API Design, Database Design, Performance Optimization
- **DevOps/Cloud:**
AWS, Apache, Nginx, Cloud Deployment, Laravel Cloud, Forge, Docker, CI/CD
- **Integrations:**
Third-Party API Integration, Payment Gateways
- **Development Practices:**
Git, GitHub, Jira, Agile/Scrum, Code Reviews, Mentoring

DEVELOPMENT TOOLS

- PhpStorm
- Cursor
- Windsurf
- Claude
- Git / GitHub

CORE EXPERTISE

- End-to-End Product Delivery
- Laravel / PHP SaaS Architecture
- Shopify & eCommerce
- Travel & Booking
- Payment Integrations
- API Design & Integrations
- Performance Optimization
- Analytics & Conversion
- AWS / Cloud

CERTIFICATION

Laravel Certified Developer

EDUCATION

B.E. Computer Science

Gujarat Technological University

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 12+ years of experience taking products from requirements and business analysis through solution architecture, development, testing, deployment, production support and continuous improvement. Strong expertise in Laravel/PHP, Vue.js, React, REST APIs, MySQL/PostgreSQL, Redis and AWS. Experience across enterprise SaaS, travel booking, Shopify/eCommerce, CRM and high-volume platforms. Also experienced in analytics, conversion tracking, checkout optimization and data-driven product improvements. Comfortable using AI-assisted development tools such as Claude, Cursor and Windsurf to accelerate development while retaining ownership of architecture, code quality, security and production delivery.

PROFESSIONAL EXPERIENCE

Senior Full Stack Developer | Curotec (Remote) - Philadelphia, USA Aug 2021 – Aug 2026 (5 yrs)

- Led development of GoPort's enterprise travel booking platform covering hotel, transportation and cruise packages.
- Owned end-to-end delivery from requirement gathering through architecture, implementation, testing, deployment and production support.
- Designed scalable Laravel applications, REST APIs and complex booking and reservation workflows.
- Implemented payment integrations, refunds, commission tracking and reporting workflows.
- Optimized database queries, queues and background processing for performance and reliability.
- Worked directly with US stakeholders to clarify requirements, estimate work and make architecture decisions.
- Used analytics and customer behavior data to identify funnel improvements and conversion opportunities.

Full Stack Developer | ManekTech - Ahmedabad, India Nov 2017 – Sep 2021 (4 yrs)

- Developed enterprise Laravel and Vue.js applications across CRM, logistics and ticket-booking domains.
- Worked across requirements, architecture, API development, implementation, testing and deployment.
- Designed REST APIs and integrated third-party services and business workflows.
- Managed cloud deployments, production debugging and performance improvements.
- Mentored junior developers and performed code reviews.

Web Developer | Versatile Techno - Ahmedabad, India Aug 2016 – Nov 2017 (1 yr)

- Built Laravel and WordPress applications, custom plugins and third-party integrations including Facebook and eBay.
- Developed REST services and business-management applications from requirements through delivery and support.

Web Developer | Agite Technologies - Ahmedabad, India Jul 2015 – Aug 2016 (1 yr)

- Developed Core PHP applications for property management, restaurant marketing and community platforms.
- Built SOAP services and maintained production systems.

Junior Web Developer | DropTechnolabs - Ahmedabad, India Jul 2014 – Jul 2015 (1 yr)

- Developed Laravel and WordPress applications, maintained client websites and implemented new features.

ANALYTICS

- Google Analytics / GA4
- Google Tag Manager
- Google Ads
- Conversion Tracking
- A/B Testing & CRO

AWARDS

Versatile Employee of the Year — 2018

Employee of the Month — 2015

KEY PROJECTS

GoPort — Enterprise Travel Booking Platform | *Travel Domain*

Technology: *Laravel, PHP, Nuxt.js (Vue), Next.js(React), REST APIs, MySQL/PostgreSQL, Redis, AWS, Google Analytics, GTM*

- Enterprise travel booking platform supporting hotel, transportation and cruise products with complex reservation workflows.
- Led end-to-end delivery from requirements gathering and technical analysis through architecture, development, testing, deployment and production support.
- Designed and implemented Laravel services, REST APIs, booking and availability logic, payment flows, refunds, commission calculations and reporting.
- Worked on asynchronous processing with queues, database optimization, caching and Redis to improve reliability and application performance.
- Collaborated directly with US stakeholders to clarify business requirements, estimate work, propose technical solutions and make architecture decisions and production releases.
- Live Project: <https://www.goport.com>

Revenue Rush — Shopify Checkout, Upsell & Downsell Platform (Multi-Tenant SaaS) | *eCommerce / Shopify Domain*

Technology: *Laravel, PHP, Shopify APIs, JavaScript, MySQL, Google Analytics, GTM*

- Built a Laravel-based checkout platform for InnoSupps/Shopify stores, including customized checkout flows, configurable upsell/downsell journeys and Shopify product/customer/order integrations.
- Owned requirements, architecture, development, testing, deployment, analytics instrumentation and production support.
- Used checkout funnel and conversion data to identify friction points and offer opportunities.
- Built and supported a multi-tenant SaaS solution with tenant-aware business logic, integrations, APIs and scalable workflows.
- Live Project: <https://www.innosupps.com/>

Cinema Booking SaaS Platform | *Cinema / Entertainment Domain*

Technology: *Laravel/PHP, Vue.js, APIs, database, transactional workflows, SaaS architecture*

- Developed a SaaS-based cinema booking platform with movie/show management, seat availability, online booking workflows and transactional business logic.
- Built an interactive Vue.js seat-picker for cinema bookings, including seat layout rendering, real-time availability, selection state and integration with the booking workflow.
- Designed reusable SaaS workflows with attention to concurrent booking scenarios and data consistency across seat selection and reservation operations.
- Live Project: <https://www.cinemavarietes.be/>

Grand Natural CRM | *CRM / Business Management Domain*

Technology: *Laravel/PHP, Vue.js, REST APIs, MySQL*

- Developed CRM and business-management workflows from requirements and API design through frontend implementation, integrations and ongoing optimization.
- Live Project: <https://www.grandnaturalinc.com/>

BD Electronics — 8M+ Products | *eCommerce / Electronics Domain*

Technology: *PHP/Laravel, MySQL, Elasticsearch, Redis, AWS, DynamoDB*

- Worked on an eCommerce/product platform handling 8M+ products, focusing on product data, search/indexing, database performance, caching, APIs and production optimization.

AI-Assisted Engineering: Use Claude, Cursor and Windsurf alongside PhpStorm/JetBrains tooling for code exploration, implementation assistance, refactoring, debugging, documentation and test creation, while retaining responsibility for architecture, security, code review, technical decisions and production quality.
